

Uchi Gold Project

HIGH-GRADE GOLD DISCOVERY PROJECTS in the ONTARIO ABITIBI GREENSTONE BELTS

Argo Gold's gold exploration projects are in the prolific NW Ontario Uchi Gold Belt and have known high-grade gold mineralization with multi ounces per tonne intercepts and known high-grade gold resources.

Visible Gold from the Uchi Project

VALUE INVESTMENT - OPPORTUNITY

Tier I Discovery Potential in NW Ontario

- › Uchi Geological Subprovince of greenstone belts.
- › One of the **most endowed gold belts in the Canadian Shield** and hosts many multi-million-ounce deposits
- › Known High-Grade gold mineralization
- › 2019 results include **132 g/t Au over 1.8 metres**
- › 2020 exploration results: pervasive gold mineralization on multiple mineralized trends
- › Excellent Infrastructure, roads & power lines

Experienced Team with Proven Track Record

- › 200+ years of combined exploration & discovery experience
- › Team has already identified **unknown gems**

Pervasive Gold Mineralization

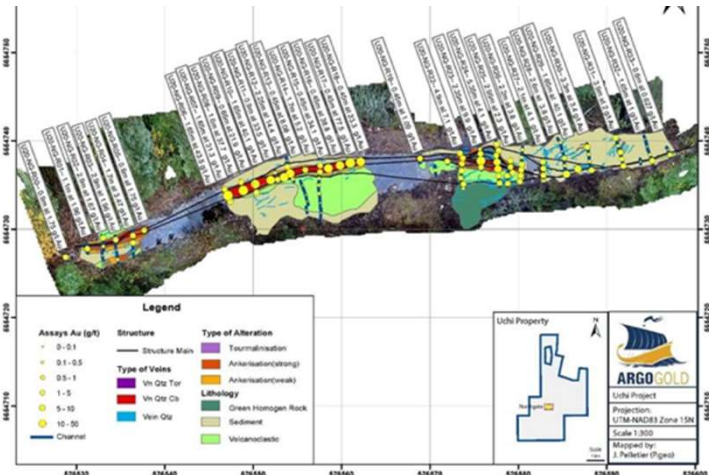

- Woco Zone mineralized strike length extended to 280m contains high-grade Woco Vein
- Northgate Zone mineralized strike length is 225m with two 15m sections of high-grade gold
- Raingold Zone has high-grade gold over 15m of the 20m strike length tested

- Woco Zone**
 - 1.1 metres of 10.4 g/t Au
 - 0.55 metres of 58.2 g/t Au
- Northgate Zone**
 - 4.9 m metres of 7.1 g/t Au
 - 5.35 metres of 4.1 g/t Au
 - 1.65 metres of 43.5 g/t Au
 - 1.65 metres of 40.1 g/t Au
 - 1.6 metres of 37.7 g/t Au
 - 0.65 metres of 77.5g/t Au
- Raingold Zone**
 - 2.3 metres of 31.2 g/t Au
 - 1.9 metres of 29.8 g/t Au
 - 1.9 metres of 10.3 g/t Au
 - 2.65 metres of 5.4 g/t Au
 - 2.6 metres of 5.5g/t Au
 - 1 metre of 21.2 g/t Au

Raingold – Au intersections from channel samplings

Northgate – Au intersections from channel sampling

Uchi – Current Exploration Targets on Total Mag
