

**ARGO GOLD INC.
MANAGEMENT'S DISCUSSION AND ANALYSIS
FOR THE YEAR ENDED DECEMBER 31, 2025**

General

The following management's discussion and analysis ("**MD&A**") of the financial condition and results of the operations of Argo Gold Inc. ("**Argo Gold**", or the "**Company**") constitutes management's review of the factors that affected the Company's financial and operating performance for the years ended December 31, 2025 and 2024. This MD&A was written to comply with the requirements of National Instrument 51-102 - Continuous Disclosure Obligations. This discussion should be read in conjunction with the financial statements of the Company for the years ended December 31, 2025 and 2024, together with the notes thereto ("**the financial statements**"). Results are reported in Canadian dollars, unless otherwise noted.

The financial statements and the financial information contained in this MD&A were prepared in accordance with International Financial Reporting Standards ("**IFRS**") as issued by the International Accounting Standards Board ("**IASB**") and interpretations of the International Financial Reporting Interpretations Committee ("**IFRIC**"). Please refer to Note 3 of the annual audited financial statements as at and for the years ended December 31, 2025 and 2024 for disclosure of the Company's significant accounting policies.

The audit committee of the Company has reviewed this MD&A and the financial statements for the years ended December 31, 2025 and 2024 and the Company's Board of Directors approved these documents prior to their release.

This MD&A is dated April 29, 2026 and is current to that date.

Additional information relating to the Company is available free of charge on the System for Electronic Document Analysis and Retrieval ("**SEDAR+**") website at www.sedarplus.ca, on the Canadian Securities Exchange ("**CSE**") website at www.thecse.com or on Argo Gold's website at www.argogold.com.

Caution Regarding Forward Looking Information

This MD&A includes certain statements that may be deemed "forward-looking statements". All statements in this discussion, other than statements of historical fact, that address future exploration activities and events or developments that the Company expects, are forward-looking statements. Although the Company believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results or developments may differ materially from those in the forward-looking statements.

Petroleum reserves

The reserves report was completed by Petrotech and Associates Ltd., an independent qualified reserves evaluator based in Calgary, Alberta and was prepared in accordance with the Canadian Oil and Gas evaluation handbook ("COGE Handbook") and National Instrument 51-101, Standards of Disclosure for Oil and Gas activities.

Qualified Persons

Technical information contained in this MD&A has been prepared by or under the supervision of and Michael Gou, MD, PhD consulting geologists for Argo Gold, who is a "Qualified Person" for the purpose of National Instrument 43-101 Standards of Disclosure for Mineral Projects ("**NI 43-101**"). He has verified the data comprising such technical information, including sampling, analytical and test data underlying the information or opinions contained herein.

Overview

Argo Gold Inc. is currently producing oil, exploring oil properties, developing oil wells in Alberta, and exploring and prospecting for minerals in Ontario and Northern Saskatchewan. The Company is incorporated under the laws of Ontario. The Company is listed on the Canadian Securities Exchange ("CSE") under the symbol **ARQ**, on the XFRA, XSTU and XBER under **A2ASDS**. The address of the Company's corporate office and principal place of business is 25 Adelaide Street, Suite 1400, Toronto, Ontario, M5C 3A1.

Description of the Business

Argo Gold Inc. ("**Argo Gold**", or the "**Company**") was incorporated under the laws of Ontario. The Company is listed on the Canadian Stock Exchange ("CSE") on the XFRA, XSTU and XBER under **A2ASDS**. The Company is currently engaged in the acquisition, exploration, and development of mineral properties and oil properties.

Argo Gold is an oil producing company. Argo's first oil well started production on March 29, 2023, three more additional oil wells were added to production in October and December 2023, and September and October 2024.

Company's Developments up to April 29, 2026

Oil and Gas Exploration and Development

November 11, 2025, Argo announced that as result of low oil prices, the partial re-drill of Lloyd 2 and the planned drilling of Lloyd 3 were not completed in 2025.

April 11, 2025, Argo entered into a mineral claim option agreement to acquire a 100% interest in the 1155-hectare Dreaver Lake property located in the Rottenstone Belt in Saskatchewan. To exercise the option, Argo has to spend \$40,000 before September 3, 2026. Dreaver Lake has weakly anomalous gold and silver sediments as well as a highly anomalous halo or coincident gold and silver in lake sediments for 10 kilometers in the down-ice direction.

January 30, 2025, Argo acquired 4,608 additional hectares of mineral claims, by staking, in the Rottenstone Belt located 140 Km North of La Ronge. Argo's total hectarage of continuous mineral claims is 26,600 hectares.

December 23, 2024, Argo entered into an agreement to acquire 100% interest in the Thunderclap mineral claim in Saskatchewan for \$1,000. This acquisition added 97 hectares for a total of 16,059 hectares of prospective uranium mineral claims in the Athabasca Basin.

December 3, 2024, Argo entered into two agreements to acquire additional mineral claims in Saskatchewan. Argo can acquire 100% interest in certain mineral claims located in the Athabasca Basin. These claims are: Parker Lake, Thunderbolt and Zig Zag claims. These claims total 15,962 hectares and are considered prospective for uranium mineralization.

Thunderbolt and Zig Zag were purchased for an aggregate of \$5,000 in cash and the issuance of 500,000 common shares. Parker Lake claims are purchased for the granting by Argo of a 2% net smelter returns royalty.

October 2024, Lindbergh's third well started producing in late October 2024. This well was drilled in October 2024. Argo participated for an 18.75% interest in development drilling.

September 2024, Lloydminster well number two started producing in mid-September 2024. This well was drilled in late August 2024. Argo's participation is for an 18.75%.

December 12, 2023 – Argo announced that a second horizontal well was producing oil at Lindbergh. The Argo's interest in this second well in the Lindbergh Area is 37.50%.

October 5, 2023 – Argo Gold announced that the seven leg multi-lateral Lloydminster oil well in the Lindbergh formation has been completed and equipped and is now producing oil. Argo's interest in the Lloyd oil well is 18.75%.

March 30, 2023 - Argo announced that the first Lindbergh oil well was drilled in mid-March 2023 and was in production. Argo participated for 37.5% of the Lindbergh oil well.

February 1, 2023 - Argo announced that the company has entered into a second participation agreement with Croverro Energy to participate in a second horizontal Lindbergh oil well proximal to Lloydminster, Alberta. Argo will pay the operator 25 per cent of the cost to drill, complete, and fully equip or abandon the well to earn an 18.75 percent working interest in the well.

Oil and Gas Opportunities

Argo also has a mutual area of interest at Lindbergh, whereby Argo can participate in additional oil wells for 37.5% of the production for 37.5% of the oil well cost. In the area proximal to the current Lindbergh oil well (southern half of property), there are drilling locations for five oil wells based on current seismic coverage. It is estimated that there are locations for an additional nine oil wells on the northern half of property upon completion of technical due diligence.

Mineral Properties

Saskatchewan Uranium Mineral Claims

The Fraser Institute's Annual Survey of Mining Companies ranked Saskatchewan as number three in the world for mineral exploration and mining. With a total of 16,059 hectares, Argo is well positioned to advance mineral exploration with high-quality assets in a mining friendly jurisdiction.

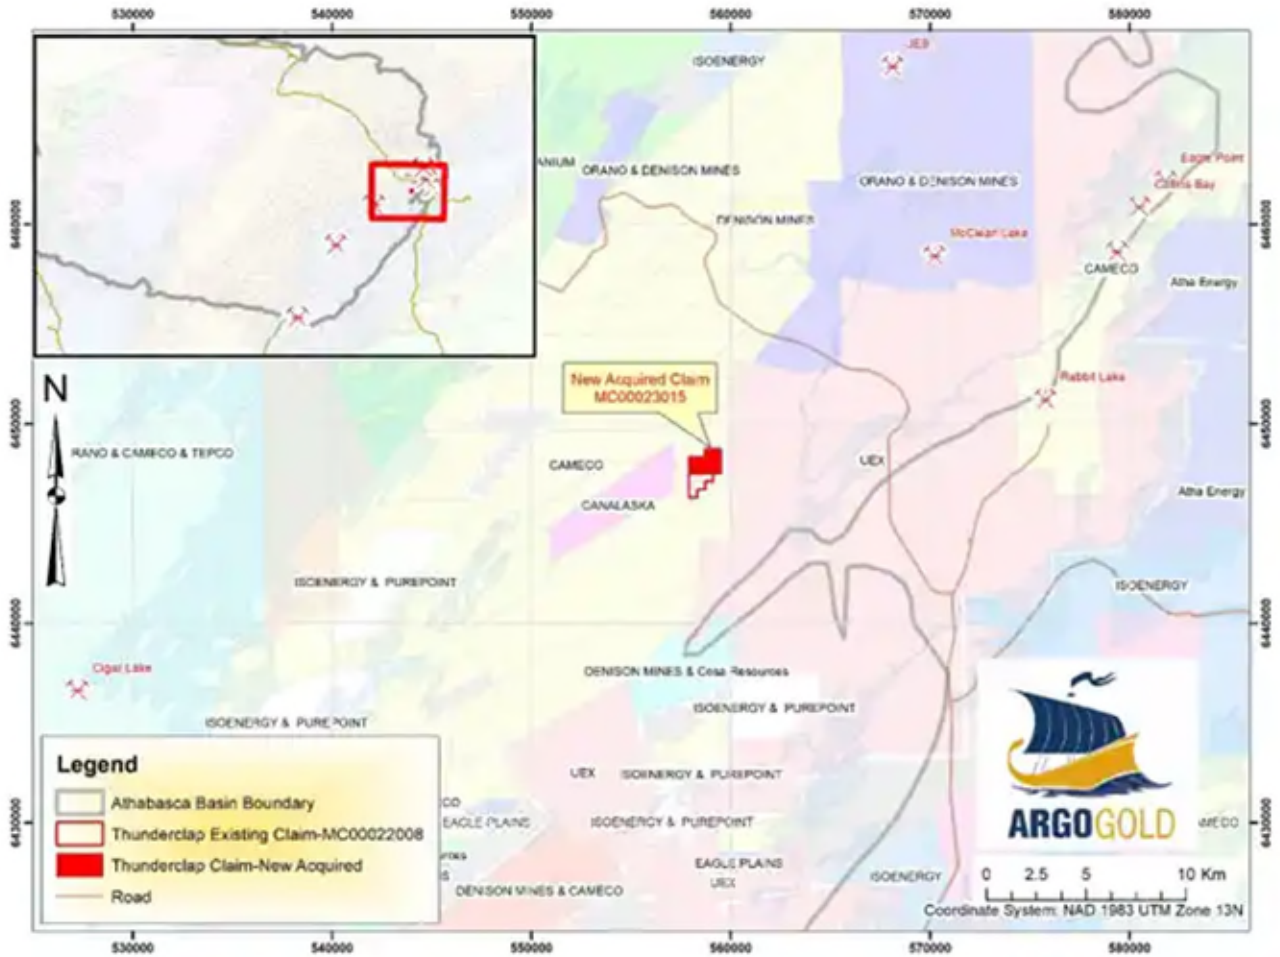

Thunderclap

November 3, 2025, Argo increased its uranium mineral claim position at Thunderclap, Argo Gold's 100% interest at Thunderclap now covers 264 hectares of prospective uranium claims in the Athabasca Basin. Together with Parker Lake, Thunderbolt and ZigZag total 15,962 hectares.

December 23, 2024, Argo acquired the Thunderclap mineral claim. This claim is located 16 kilometres SSW of the McLean Lake Uranium Mine and Mill, 18 kilometres SW of the Rabbit Lake Mine and Mill, 30 kilometres NE of Cameco's Cigar Lake High Grade Uranium Mine, 12 kilometres south of the Points North Landing camp and airstrip, and 17 kilometres south of Denison Mine's Midwest Lake ISR uranium deposit. Thunderclap is surrounded by Cameco Corporation, with Uranium Energy Corp (UEC) to the immediate east.

To the east of the Thunderclap mineral claim, drilling by Asamera in 1982 returned 0.13% U_3O_8 over 4 metres in sheared, reduced yellow brown to olive green chlorite schist. The unconformity lies at a depth of 182 metres with bleaching, hematite and chlorite alteration in basement rocks. (Reference: SMDI 1969 located 600 metres east of Thunderclap). A second drill hole intersected the unconformity at 212.6 metres returning 0.17% U_3O_8 over 1.0 metre from graphitic gouge in carbonate veining and chlorotic alteration in graphitic perlitite in basement rocks. (Reference: SDMI 2552 is located 1500 metres east of Thunderclap).

To the NW of Thunderclap and 5.28 kilometres south of the Midwest Lake Uranium Deposit, historical drilling intersected 0.25% eU_3O_8 over 4.0 metres in DDH Q85-24 from 166.3 to 170.3 metres in the lower sandstone and regolith in black pyritic sandstone and 1.1 metres in the lower sandstone of 14.8% Ni, 7.2% Co, 1.44% Cu, 1.14% As and 0.16% Pb. (Reference: SMDI 2551). Historic drilling 3.5 kilometres to the SW of Thunderclap returned 0.34% U_3O_8 over 0.5 metres as well as anomalous nickel arsenide, cobalt, copper, lead and zinc. (Reference: SMDI 2751). The anomalous polymetallic mineralization is considered to be very significant, as the Cigar Lake high grade uranium mine carries similar polymetallic mineralization along with the uranium and gold/silver. The Thunderclap Property is considered highly prospective and has never been drilled-tested.

Parker Lake

The Parker Lake claims total 11,644 hectares covering the up-ice extension of 69 radioactive boulders (1,000-10,000 cps) along the Needle Falls Shear Zone, a cluster of untested airborne radioactive anomalies (1969), and 30 kilometres stretch of the Parker Lake Shear Zone (PLSZ) coincident with uranium, vanadium & molybdenum in lake sediments. The geological setting is thought to be similar to that of the Rabbit Lake/Eagle Point Mine with the shear structure along a large dome. Parker Lake is located outside of the eastern edge of the Athabasca Basin, 72 kilometres east of Cameco’s Key Lake Mill with the target being a shallow basement-hosted deposit.

Thunderbolt

The Thunderbolt mineral claims total 3,692 hectares covering weakly conductive magnetic zones extending into the basement from historical airborne surveys. Thunderbolt is located approximately 15 kilometres north of ISO Energy’s Hurricane Deposit (48 million pounds U3O8 @ 34.5% U3O8). Thunderbolt is also located 15 kilometres NE of the Bell Lake uranium occurrence where drilling by Denison Mines hit up to 42 metres of bleached and altered rock above the unconformity. The claims are located within the Athabasca Basin near the eastern edge, 40 kilometres northwest of Orano’s McLean Lake Mill.

The Thunderclap mineral claim is located 16 kilometers SSW of the McClean Lake Uranium Mine and Mill, 18 kilometers SW of the Rabbit Lake Mine and Mill, 30 kilometers NE of Cameco’s Cigar Lake high grade uranium mine, 12 kilometers south of the Points North Landing camp and airstrip, and 17 kilometers south of Denison Mine’s Lake ISR uranium deposit. Thunderclap is surrounded by Cameco Corporation, with Uranium Energy Coro (UEC) to the immediate east.

Zigzag

The Zig Zag mineral claims total 626 hectares along the Patterson Lake Shear Zone (PLSZ) where an airborne EM conductor runs down the center of the Zig Zag claim, modelled to extend into the basement. In addition, an airborne survey flown by SPI delineated several “mag low” anomalies on the claim, coincident with the conductor. Zig Zag is on-trend with the NexGen Energy Arrow Deposit, the Fission Uranium Triple R (Rook) Deposit and the F3 Uranium discoveries. The Zig Zag mineral claims are located 25 kilometres north of Hook Lake (a joint venture between Cameco, Orano Canada and Purepoint Uranium).

North Saskatchewan Claims

Dreaver Lake

September 22, 2025, Argo obtained its mineral exploration permits from the Saskatchewan Ministry of Environment for Argo Gold’s projects in Rottenstone Belt in Saskatchewan. The permit covers 26,661 hectares of mineral claims in the emerging Rottenstone Belt and 1,155 hectares at the Dreaver Lake Gold Project.

April 11, 2025, Argo entered into a mineral claim option agreement (the “Option”) to acquire a 100% interest in the 1155-hectare Dreaver Lake property (the “Claim”) located in the Rottenstone Belt in Saskatchewan.

Dreaver Lake has weakly anomalous gold and silver in lake sediments as well as a highly anomalous halo of coincident gold and silver in lake sediments for 10 kilometres in the down-ice direction. (GSC). In 1968, prospecting at Dreaver Lake identified outcrops of quartz diorite rock consistent with rock hosting the gold mineralization in the Ramp Metals discovery hole Ranger 1 which intersected 73.55 grams/tonne Au over 7.5 metres from 227 to 234.5 metres. (Ramp Metals, June 17, 2024). Exploration work in the 1960’s was focused on nickel and copper, not gold. An airborne survey conducted for Noranda Exploration in 1966 at Dreaver Lake delineated 3 conductors, all with associated magnetic highs, in the metasediments flanking the intrusive granites. The highest priority target is a strong, wide EM conductor that is approximately 1.5 km in length with associated magnetic highs on both sides. All 3 conductors remain undrilled. The Dreaver Lake mineral claims are located approximately 12 km southeast of the Ramp Metals Property.

The Dreaver Lake property is contiguous to that of Eagle Plains Resources where trench sampling on the Cook Showing returned 79.96 g/t Au over 1.0 metre, and a grab sample returned up to 78.84 g/t Au, 2.7 g/t Ag, 0.146% Pb and 0.019% Cu (Eagle Plains website, 2025). Approximately 5 kilometres southwest of the Dreaver Lake Property, Fathom Nickel is currently exploring at Gochager Lake where recent drilling intersected 18.1 metres @ 2.43% Ni, 0.51% Cu and 0.18% Co. (Fathom Nickel, April 12, 2023). Rock chip and soil geochemical sampling has extended the Gochager footprint by 2 kilometres to the southwest and 2 kilometres to the Northeast. (Fathom Nickel, August 26, 2024). Underground exploration drilling at the past-producing Roy Lloyd mine located 20 kilometres south of Dreaver Lake intersected 8.17 metres (5.32 metres true width) of 66.85 g/t Au, 6.79 metres (4.42 metres true width) of 80.12 g/t Au and 2.23 metres (1.73 metres true width) of 128.37 g/t Au at a depth of approximately 240 metres. (Matrixset Investment Corp. website).

Argo recently completed a compilation of all historic data on its mineral claims acquired this past three months ended (Argo Gold, August 7, 2024 and Argo Gold, January 20, 2025); and identified additional prospective mineral exploration ground where anomalous gold, silver and copper in lake sediments (GSC) coincide with an interpreted fold axis from historic geophysical data. Argo’s mineral claim position in the Rottenstone Belt covers areas of interest including: anomalous copper in soils, electromagnetic conductors identified by historic geophysical surveys, ultramafic rocks, the Gow Lake meteor crater area, and the geological strike extension of the Rottenstone Mine.

January 30, 2025, Argo acquired an additional 4,608 hectares of mineral claims; this acquisition was made by staking in the Rottenstone Belt. With this addition, Argo completed 26,600 hectares of contiguous mineral claims

August 7, 2024 – Argo entered into an agreement to acquire mineral claims in North Saskatchewan. The Company acquired 100% of mineral claims located 120 kilometers north of La Ronge, Saskatchewan

The North Saskatchewan claims consist of 5,955 hectares proximal to the past-producing Rottenstone Mine which produced Nickel, copper, gold and platinum group of metals from 1965 to 1969. In addition to this acquisition, the Company has staked 15,161 hectares in the Rottenstone area identifying areas of interest that include anomalous copper in soils, electromagnetic conductors identified by historic geophysical surveys, ultramafic rocks, the Gow Lake meteor crater area and the geological strike extension of the Rottenstone Mine. The Company owns a total of 21,116 hectares of high-quality exploration targets in this emerging metallogenic district.

Uchi Gold Project

April 16, 2026, Argo announced that it recently received its mineral exploration permit for the Uchi lake Project located 90 kilometers east of Red Lake Ontario.

Argo Gold announced that a gold mineralized extension has been identified at the Raingold and HST Zone at the Uchi Gold Project. Raingold is located along the HST Zone (Hill-Sloan-Tivy) which also hosts the past-producing Grasset Mine to the north. The HST Zone is a parallel mineralized trend located one km west of the main Uchi - Northgate gold mineralized trend.

In Spring 2021, Argo Gold drilled a total of 399 metres at the Raingold and the HST Zone. Only anomalous gold was intersected at depth. A step-out drill hole located 100 metres to the north identified anomalous gold across two structures where the second mineralized structure is identified as a new mineralized trend 100 metres to the east of the HST Zone. In Spring 2021, Argo Gold also confirmed high-grade gold in channel sampling 32.84 g/t Au over 2.5 metres at Raingold.

In late 2021, Argo Gold also completed overburden stripping and washing for 280 metres south of the high-grade Raingold area along the near vertical HST Zone following quartz veining and sulphide mineralization along the sheared break. Nine ty-two channel samples across 35 channels perpendicular to strike were taken along the south extension of the Raingold - HST Zone with an average spacing of 7.7 metres. Gold mineralization is associated with abundant quartz veins and veinlets, iron formation, pyrite or ankerite alteration. The Fall 2021 channel samples are shown on the Raingold map where the best intercept is 15.4 g/t Au over 0.9 metres. It is significant that this highest sample was the farthest sample to the south and the trench geologic structure remains open in that direction.

Talbot Lake Gold Project

In June 2020, Argo Gold acquired the Talbot Lake Gold Project located 100 kilometres north east of Pickle Lake in the prolific Uchi Geologic Subprovince (see Argo Gold news release June 11, 2020). The property hosts a historical non-NI 43-101 compliant mineral resource estimate of approximately 50,000 ounces at 14.0 g/t Au in a quartz vein system, starting at surface. There is also known gold mineralization in the associated banded iron formations ("**BIFs**") stretching over 23 line kilometres, which holds the potential for Musselwhite Mine type mineralization (over 20 three months ended s of 200,000 ounces of annual production). Gold mineralization in BIFs can be very pervasive.

The Company believes the current historical non-NI 43-101 compliant estimated mineral resource has the potential to be expanded. Prior to the acquisition of Talbot Lake from Denison Mines Inc., the property had been sitting unexplored within a uranium company.

Hurdman Silver-Zinc Project

April 14, 2026, Argo Gold announced that it recently acquired through staking an additional 35 square kilometers at the Hurdman Silver-Zinc Project.

February 18, 2026, Argo Gold Inc. entered into an agreement to acquire 100% interest in certain mineral claims known as the 'Hurdman Silver-Zinc Project' (Hurdman). Hurdman is located 120 km north of Timmins, Ontario, totals 2474 hectares covering known mineralization, as well as structural and geophysical targets that are considered prospective for additional silver and zinc mineralization.

The mineral claims are being purchased in exchange for the issuance to the vendors of 1,250,000 common shares of the Company. These common shares will be issued at a deemed price of \$.0125 cents per share. The common shares will be subject to a statutory hold period of four months and one day from their date of issuance. Argo is also granting the vendors a small net smelter returns royalty (NSR) in respect of the mineral claims comprising the Hurdman project.

The Hurdman Silver-Zinc mineralization occurs 450 metres along strike as Silver-Zinc rich semi-massive to massive sulphides, dipping 15 to 25 metres north, within 150 metres of surface. Historical drill widths vary from 1 to 38 metres in true thickness, and the mineralization remains open in all directions. One significant drill intercept is 3.0% zinc and 12.1 g/t silver over 23.6 metres. There are also significant gold intercepts including 48.7 g/t Au over 0.5 metres and 2.5 g/t Au over 4.1 metres. There are numerous untested conductors and structural corridors that may host additional mineralization. Hurdman occurs at the juncture of the Quetico Metasedimentary Belt and the Kapuskasing Structural Zone and is considered to be an Archean Sedex type deposit.

Financings

June 26, 2025 – Argo Announced normal course bid (NCIB) renewal to purchase and cancel Argo's shares either an aggregate of 3,654,388 shares representing 5% of Argo's issued and outstanding common shares. The NCIB will end June 26, 2026.

As at December 31, 2025, 877,807 shares had been repurchased.

June 25, 2024 – Argo announced normal course issuer bid (NCIB) to purchase and cancellation, over a 12-month, an aggregate amount of up to 3,617,692 common shares, representing five percent of the Company's issued and outstanding common shares. The NCIB will end on June 26, 2025, unless the maximum number of common shares is purchased before then or Argo provides earlier notice of termination.

November 2, 2023 – Argo Gold announced that it had closed the second tranche of its previously announced non-brokered private placement. In the second tranche, the Company issued 2,700,000 common shares at a price of \$0.10 per share for gross proceeds of \$268,000. The shares issued under the financing are subject to a four-month and one day statutory hold expiring on March 1, 2024.

May 1, 2023, Argo issued 3,650,000 shares at \$0.10 per share for gross proceeds of \$347,000. The total number of outstanding shares after the new share issuance was 69,635.

Sale of Investments

March 3, 2023, Argo Sold 218,000 shares of Manitou Gold Inc. for net proceeds of \$9,640. Argo no longer has an investment in Manitou Gold Inc.

January 12, 2023, Argo sold 2,500,000 shares of Cross River Ventures Corp. for gross proceeds of \$50,000. Argo no longer has an investment in Cross River Ventures Corp.

December 21, 2022, Argo sold 32,000 shares of Manitou Gold Inc. for net proceeds of \$450.

Overview of Financial Results

For the three months ended December 31, 2025 and 2024, vs the twelve months ended December 31, 2025 and 2024.

(Expressed in Canadian Dollars)	Notes	Three months ended December 31,		Twelve months ended December 31,	
		2025	2024	2025	2024
Revenue		\$ 187,588	\$ 594,275	\$ 1,519,855	\$ 2,241,635
Expenses					
Oil and gas operating expenses		80,094	107,711	493,071	595,380
Oil and gas depletion, depreciation and accretion		250,623	68,331	419,039	399,828
Mineral properties exploration and evaluation		8,593	17,000	40,439	25,937

Net comprehensive income (loss) for the year		(\$945,178)	230,298	(\$920,947)	437,084
Basic and fully diluted earnings per share		(0.01)	0.00	(0.01)	0.01
Weighted average number of shares outstanding – basic and diluted		72,087,774	73,565,524	72,087,774	73,565,524

Three months ended December 31, 2025, vs. three months December 31, 2024.

- Gross revenue after royalties from Lindbergh and Lloydminster oil wells was \$187,587 for the quarter ended December 31, 2025, compared to \$504,930 in the quarter ended December 31, 2024. Lower production and lower oil prices resulted in less gross revenue for the quarter.
- Oil and gas expenses were \$80,093 in the three months ended December 31, 2025 (\$187,067 in the three months ended of 2024). Lower expenses also due to lower production.
- Exploration and evaluation expenses for mineral properties were \$8,591 in the three months ended December 31, 2025 compared to (\$10,486 during the three months ended December 31, 2024). In 2024, half of the CEO fees were allocated to mineral exploration in 2025.
- Management fees were \$30,000 in the three months ended December 31, 2025 compared to \$15,000 in the fourth quarter of 2024. This is due to all management fees, in 2025, being allocated to management and not exploration.
- Consulting fees were \$15,000 during the three months ended December 31, 2025, compared to \$887 in the three months ended December 31, 2024.

- Professional fees were \$57,017 during the three months ended December 31, 2025 compared to \$69,143 during the three months ended December 31, 2024. Professional fees include legal and controllership fees. Higher legal fees were paid in the three months ended December 31, 2024.
- Business development was \$15,825 during the three months ended December 31, 2025 compared to \$11,411 during the three months ended December 31, 2024.
- Investor relations total was \$20,000 during the three months ended December 31, 2025 compared to \$28,000 during the three months ended December 31, 2024. In the fourth quarter of 2024. With lower production numbers, Argo's management is also reducing costs by cancelling some public relation contracts.
- General and administrative expenses were \$22,602 in the three months ended December 31, 2025 compared to \$20,205 in the three months ended December 31, 2024. With less revenue, management is reducing administrative expenses.
- Listing, filing, and regulatory fees were \$6,692 in the three months ended December 31, 2025 compared to \$7,497 during the three months ended December 31, 2024.
- Loss on oil wells impairment was \$481,023. Production and a new more conservative reserve report triggered impairment testing with a resulting loss in the last quarter of 2025.
- Depreciation in the three months ended December 31, 2025 was \$548 compared to \$377 in the three months ended December 31, 2024. The increase in depreciation is driven by the replacement of equipment that was obsolete.
- Interest income was \$Nil in the three months ended 2025 compared to \$1,849 in interest revenue in the three months ended December 31, 2024. The decrease in 2025 is due to the impairment of a \$50,000 note receivable at 15%. This note receivable was written off after management decided that it was not collectable.
- Interest expense was in the three month ended December 31, 2025, \$43,918 compared to \$28,070 in the three months ended December 31, 2024. Interest expense is attributable in its entirety to the loan from the Company's CEO.
- Financing fees on the CEO's short term loan were awarded to the CEO for the risk undertaken in securing all the loans.
- Overall, the Company recorded a net loss of \$945,178, \$0.01 per share for the quarter ended December 31, 2025, compared to a net loss \$122,679 or \$Nil per share for the quarter ended December 31, 2024. Lower production and higher maintenance costs are to blame for the loss in the three months ended December 31, 2025 and 2024.

Year ended December 31, 2025, vs. year ended December 31, 2024.

- Revenue for the year ended December 31, 2025, was \$1,519,855 compared to \$2,241,635 for the year ended December 31, 2024. Oil production decreased in the year ended December 31, 2025 compared to the first year ended of 2024.
- Oil and gas operating expenses are \$493,071 in the year ended December 31, 2025. In the year ended December 31, 2024, oil and gas expenses were \$595,380. Lower production numbers have not lowered operating expenses.
- Exploration and evaluation expenses, in the year ended December 31, 2025, were \$40,439 compared to \$25,937 in the year ended December 31, 2024. Exploration expenses in 2024 included a percentage of management's salary but that policy was changed for the twelve months ended December 31, 2025.
- Management Fees, \$120,000 for the year ended December 31, 2025, compared to \$60,000 for the year ended December 31, 2024. 100% of CEO's management fees were allocated to this category. In 2024, 50% of the CEO's management fees were allocated to exploration.
- Consulting fees, for the year ended December 31, 2025, were \$49,400 compared to \$10,636 for the year ended December 31, 2024. Companies related to Argo's board of directors were compensated for governance and support work performed during the first year ended December 31, 2025.
- Professional fees for the year ended December 31, 2025, were \$222,943 compared to \$228,440 for the year ended December 31, 2024. Lower fees by management to better manage cash

- outputs.
- Business development, \$45,206 for the year ended December 31, 2025, compared to \$131,393 for the twelve months ended December 31, 2024. The higher business development amount in 2024 is due to higher expenses in marketing related costs to promote Argo as an oil producing company.
 - Investor relations, \$72,000 for the year ended December 31, 2025, compared to \$92,563 for the year ended December 31, 2024. The difference is an effort to reduce expenses because of lower oil production.
 - General and administrative, \$101,170 for the year ended December 31, 2025, compared to \$62,511 for the year ended December 31, 2024. The higher amount in the year ended December 31, 2025, is due to an increased amount of travel expenses.
 - Listing filing and regulatory fees, \$29,457 for the year ended December 31, 2025, compared to \$31,965 for the year ended December 31, 2024.
 - Depreciation, \$2,188 for the year ended December 31, 2025, compared to \$2,864 for the year ended December 31, 2024. Most of the equipment has been fully depreciated.
 - Bank charges and other, \$19,069 for the year ended December 31, 2025, compared to \$1,589 for the year ended December 31, 2024. The difference is related to the initial penalty resulting from the 2020-2022 part XII audit.
 - Interest expense – short term loan, this expense in both periods is related solely to the interest and renewal fees of the CEO's loan to Argo.
 - Financing fees on short-term loan from CEO. The CEO was awarded \$200,000 for finding and securing the loan to Argo for the oil drilling.
 - Net loss and comprehensive loss for the period, the Company reported a net loss of \$920,947 for the year ended December 31, 2025. In comparison for the year ended December 31, 2024, the company reported a net profit of \$437,084. This reduced net profit is the consequence of lower production and increased operating expenses.

Selected Quarterly Financial Information

The following table is a summary of selected financial information for the Company for the eight most recently completed financial quarters. It has been derived from the unaudited interim financial statements of the Company. The information has been prepared by management in accordance with IFRS and is expressed in Canadian dollars.

	2025			
	Q1	Q2	Q3	Q4
Revenue	\$ 576,775	\$ 400,435	\$ 355,058	\$ 187,588
(Loss) income and comprehensive loss	122,492	(\$162,600)	\$64,339	(\$945,178)
(Loss) income per share - basic and diluted	(\$0.00)	(\$0.00)	(\$0.01)	(0.01)
Assets	\$ 3,294,958	\$ 3,215,577	\$ 3,175,707	\$ 2,283,327

	2024			
	Q1	Q2	Q3	Q4
Revenue	\$ 521,189	\$ 621,241	\$ 594,275	\$ 504,930
(Loss) income and comprehensive loss	44,944	(\$284,519)	230,298	(122,679)
(Loss) income per share - basic and diluted	(\$0.00)	(\$0.00)	(\$0.00)	(\$0.00)
Assets	\$ 2,800,032	\$ 2,949,801	\$ 3,206,055	\$ 3,298,224

Liquidity and Capital Resources

The Company's cash decreased \$154,856 in the year ended December 31, 2025, compared to an increase in cash of \$280,940 in the three months ended December 31, 2024.

The Company's cash decreased \$159,898 in the year ended December 31, 2025, compared to an increase in cash of \$215,027 in the twelve months ended December 31, 2024.

Working Capital

As at December 31, 2025, the Company had a working capital deficit of \$1,524,021 compared to a working capital deficit of \$1,098,211 as at December 31, 2024.

A summary of the Company's cash position and changes in cash for the three and year ended December 31, 2025, and 2024 are provided below:

	Three Months Ended		Twelve Months Ended	
	December 31,		December 31,	
	2025	2024	2025	2024
Cash used in operating activities	(213,320)	\$126,956	(\$4,757)	\$932,157
Changes in non-cash operating working capital	98,790	188,743	120,828	20,274
Cash used in operating activities - net	(114,530)	315,699	\$116,071	\$952,431
Cash used in investing activities	(6,751)	(14,732)	(156,620)	(714,263)
Cash provided (used) by financing activities	(31,033)	(20,028)	(\$119,349)	(23,142)
Increase (decrease) in cash	(152,314)	\$280,939	(\$159,898)	215,026
Cash, beginning of period	282,331	8,976	289,915	74,889
Cash, end of period	\$130,017	\$289,915	\$130,017	\$289,915

Operating Activities

Cash used in operating activities before changes in non-cash working capital during the three months ended December 31, 2025, was \$213,320 compared to cash from operating activities of (\$126,956) for the three months ended December 31, 2024. This difference is due to lower oil production and higher maintenance fees.

Cash from operating activities before changes in non-cash working capital during the year ended December 31, 2025, was (\$5,063) compared to \$932,157 cash from operating activities during the same period in 2024. The decrease in oil production resulted in a decrease in cash.

Investing Activities

During the three months ended December 31, 2025, cash used in investing activities was \$6,751 compared to \$14,732 in the three months ended December 31, 2024. The investment in the drilling of the Company's five existing oil producing wells, located in the Lindbergh and the Lloydminster areas happened in 2023 and in 2024. The three months ended of 2025, investing activities in oil and gas were halted due to the lower oil prices and lower production numbers.

Cash used in investing activities in the year ended December 31, 2025, was \$156,620 compared to \$714,263 cash used in investing activities in the year ended December 31, 2024. In 2024 Argo spent more investing activities as oil production and oil prices were higher than in 2025.

Financing Activities

The outflow of cash for financing activities in the three months ended December 31, 2025, was \$31,033 compared to \$20,028 in the three months ended December 31, 2024. In the three months ended

December 31, 2025, cash was used to buy back and cancel shares. The share buyback program started in 2024

The outflow of cash for financing activities in the year ended December 31, 2025, was \$119,349 compared to \$23,142 in the year ended December 31, 2024. In 2025, cash was used to fund the share buyback program.

Liquidity Outlook

The Company's management remains committed to prudent financial management to ensure long-term sustainability and growth.

In general, completion of all the Company's ongoing and future exploration and development initiatives and its ability to continue as a going concern are subject to successfully raising additional funding (see "Risks and Uncertainties").

Related Party Transactions and Key Management Compensation

Key Management Compensation

In accordance with IAS 24, key management personnel are those persons having authority and responsibility for planning, directing, and controlling the activities of the Company directly or indirectly, including any directors (executive and non-executive) of the Company. Key management of Argo Gold includes the Chief Executive Officer and the Chief Financial Officer.

Related Party Transactions and Key Management Compensation

In accordance with IAS 24, key management personnel are those persons having authority and responsibility for planning, directing, and controlling the activities of the Company directly or indirectly, including any directors (executive and non-executive) of the Company. Key management of Argo Gold includes the Chief Executive Officer and the Vice President Finance and Chief Financial Officer.

	2025		2024
	December 31,		December 31,
Management fees ⁽¹⁾	\$	120,000	\$ 120,000
Consulting fees - paid to independent directors		49,400	10,636
Total fees paid to management	\$	169,400	\$ 130,636

(1) In 2024 50% of Management fees were allocated to exploration

Related Party Transactions

Related parties include the Board of Directors, senior management, close family members and enterprises that are controlled by these individuals as well as certain persons performing similar functions.

- a) Judy Baker, Argo Gold's CEO loaned the company a total of \$1,109,683. There are no covenants attached to it.

b)

Interest on short term loan	2025		2024	
Interest payable as at beginning of year	\$	173,241	\$	102,359
Interest adjustment true up		(\$35,483)		-
Interest expense		127,212		110,220
Financing fees		200,000		-
Renewal fees		8,020		-
Less: interest and renewal fees payment		(240,750)		(39,338)
Total interest and financing owed at year ended	\$	232,240	\$	173,241

- c) On October 30, 2023, The Company entered into a \$50,000 convertible note agreement with Caravel Resources Corp. (“Caravel”) bearing an annual interest rate of 15%. The principal plus any accrued interest is payable October 31, 2024. The Company has the option to convert the principal amount and any accrued interest into equity units at the conversion price of \$0.075 on the loan due date. George Langdon is the CEO and director of Caravel Resources Corp. He is also a member of the Company’s board of directors. For the three months ended December 31, 2024, the Company had recognized Interest income of \$7,508. Management decided that the note receivable, including its interest, was uncollectable and was written off.

Subsequently, in June 2025, Caravel awarded common shares to Argo and gave Argo the option of purchasing a share for every share held by Argo. Caravel is a privately owned company and its shares are not publicly traded.

Outstanding Capital and Share Data

Argo Gold's authorized capital stock consists of an unlimited number of common shares without par value. As at December 31, 2025, there were 72,087,774 common shares issued and outstanding and Argo. The total number of shares bought back and cancelled as at December 31, 2025 was 1,747,807.

Off-Balance Sheet Arrangements

In the normal course of business, the Company evaluates property acquisition and sale transactions and, in some cases, makes proposals to acquire or sell such properties. These proposals, which are usually subject to Board and sometimes regulatory and shareholder approvals, may involve future payments, share issuances and property work commitments. These future obligations are usually contingent in nature and generally the Company is only required to incur the obligation if it wishes to continue with the transaction.

Financial Instruments

The Company manages its exposure to several different financial risks arising from its operations as well as its use of financial instruments including market risks (commodity prices, foreign currency exchange rate and interest rate), credit risk and liquidity risk through its risk management strategy. The objective of the strategy is to support the delivery of the Company's financial targets while protecting its future financial security and flexibility.

Financial risks are primarily managed and monitored through operating and financing activities and, if required, using derivative financial instruments. The Company does not use derivative financial instruments for purposes other than risk management. The financial risks are evaluated regularly with due consideration to changes in the key economic indicators and up to date market information.

Market Risk

Market risk is the risk or uncertainty arising from possible market price movements and their impact on the future performance of the business. The Company may use derivative financial instruments such as foreign exchange contracts and interest rate swaps to manage certain exposures. These market risks are evaluated by monitoring changes in key economic indicators and market information on an ongoing basis.

Commodity Risk

The Company is exposed to price risk with respect to commodity prices. Commodity price risk is defined as the potential adverse impact on earnings and economic value due to commodity price movements and volatilities. The Company monitors commodity prices as they relate to gold and the stock market to determine the appropriate course of action to be taken.

Liquidity Risk

Liquidity risk encompasses the risk that a company cannot meet its financial obligations in full. The Company's main source of liquidity comes from the sale of oil. These funds are primarily used for operating expenses, capital expenditures and acquisitions.

The Company manages its liquidity risk by regularly monitoring its cash flows from operating activities and holding adequate amounts of cash.

Oil production is the main source of liquidity for the Company and liquidity risk is currently having only two companies to sell its production to, this in addition to any accidents or force majeure that could prevent the continued production of oil from its wells.

As at December 31, 2025, the Company held cash of \$130,017 (December 31, 2024 - \$289,915) to settle current liabilities of \$1,755,228 (December 31, 2024- \$1,740,209).

Interest Rate Risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate due to changes in market interest rates. Cash bears interest at market rates. The short-term loan from the Companies CEO has a fixed rate.

Credit Risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss.

The Company has accounts receivable risk as the number of customers it currently has is only two.

Critical Accounting Policies and the Use of Estimates

The preparation of the annual financial statements in conformity with IFRS requires management to make estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and reported amounts of expenses during the reporting year ended December 31, 2025 . Actual outcomes could differ from those estimates. A detailed summary of the Company's significant accounting policies, including the use of estimates, is included in Notes 2 and 3 of the Company's audited financial statements for the year ended December 31, 2025.

Commitments and Contingencies

The Company's exploration and evaluation activities are subject to laws and regulations governing the protection of the environment. These laws and regulations are continually changing and generally

becoming more restrictive. The Company believes its activities are materially in compliance with all applicable laws and regulations. The Company has made, and expects to make in the future, expenditures to comply with such laws and regulations.

Risks and Uncertainties

Readers of the M D&A should give careful consideration to the information included or incorporated by reference in this document and the Company's audited condensed financial statements and related notes. Argo Gold's business of producing oil and exploring and developing oil wells and mineral resources involves a variety of operational, financial and regulatory risks that are typical in the natural resource industry, including the limited extent of the Company's assets, the Company's state of development and the degree of reliance upon the expertise of management. The Company attempts to mitigate these risks and minimize their effect on its financial performance, The Company's common shares should be considered speculative. Only those persons who can bear the risk of the entire loss of their investment should participate.

An investor should carefully consider the risks described in the Company's audited financial statements for the year ended December 31, 2024, before investing in the Company's common shares. These documents have been posted on the Company's website at www.argogold.com and are available on SEDAR at www.sedar.com. The risks described in these documents is not an exhaustive list. Additional risks that the Company currently believes are immaterial may become important factors that affect the Company's business in the future. If any of the risks noted in the Company's financial disclosure occur, or if others occur, the Company's business, operating results and financial condition could be seriously harmed and could cause actual events to differ materially from those described in forward- looking statements relating to the Company. In this event, investors may lose part or all of their investment.

Regulatory standards continue to change, making the review process longer, more complex and more costly. Even if an apparently mineable mineral deposit is developed, there is no assurance that it will ever reach production or be profitable, as its potential economics are influenced by many key factors such as commodity prices, foreign exchange rates, equity markets and political interference, which cannot be controlled by management. As a result, the Company's future business, operations, and financial condition could differ materially from the forward-looking information contained in this MD&A and described in the "Forward-Looking Statements" section below.

Forward Looking Statements

This report may contain forward-looking statements that involve a number of risks and uncertainties, including statements regarding the outlook for the Company's business and operational results. By nature, these risks and uncertainties could cause actual results to differ materially from what has been indicated. Factors that could cause actual results to differ materially from any forward-looking statement include but are not limited to failure to establish estimated resources and reserves, the grade and recovery of ore which is mined from estimates, capital and operating costs varying significantly from estimates, delays or failure in obtaining governmental, environmental or other project approvals and other factors including those risks and uncertainties identified above. The Company undertakes no obligation to update publicly or otherwise revise any forward-looking information as a result of new information, future results or other such factors, which affect this information, except as required by law.

Management's Evaluation of Disclosure Controls

Management is responsible for the design and effectiveness of disclosure controls and procedures to provide reasonable assurance that material information related to the Company is made known to the Company's certifying officers. The Company's Chief Executive Officer has evaluated the effectiveness of the Company's disclosure controls and procedures as at December 31, 2025, and have concluded that these controls and procedures are effective.

Internal Control over Financial Reporting:

Management is responsible for the design of internal controls over financial reporting to provide reasonable assurance regarding the reliability of financial reporting and the preparation of the financial statements in accordance with accounting principles generally accepted in Canada. Based on a review of its control procedures at the year ended December 31, 2025 covered by this MD&A, management believes its internal controls and procedures are appropriately designed as at December 31, 2025.

Other MD&A Requirements

Subsequent Events

February 18, 2026, The Company entered into an agreement to acquire a 100% interest in certain mineral claims known as the “Hurdman Silver-Zinc Project”. The Hurdman Silver-Zinc Project is located 120 km north of Timmins, Ontario, totals 2474 hectares covering known mineralization, as well as structural and geophysical targets that are considered prospective for additional silver and zinc mineralization.

The mineral claims are being purchased in exchange for the issuance to the vendors of 1,250,000 common shares of the Company to be issued. The common shares will be subject to a statutory hold period of four months and one day from their date of issuance. Argo is also granting the vendors a small net smelter returns royalty (“**NSR**”) in respect of the mineral claims comprising the Hurdman Silver-Zinc Project.

March 1, 2026, The Company awarded 4,000,000 options to consultants at \$0.12.

Additional Disclosure for Companies Without Significant Revenue

Additional disclosure concerning Argo Gold's exploration and evaluation expenditures, oil and mineral property costs and general and administrative expenses is provided in the Company's audited financial statements for the year ended December 31, 2025, that are available on the Company's website at www.argogold.com and on SEDAR+ at www.sedarplus.ca.

Approval

The Board of Directors of Argo Gold approved the disclosure contained in this MD&A on April 29, 2026. A copy of this MD&A will be provided to anyone who requests it from the Company.
